

R E M A R K S

The applicant and his attorney note with appreciation the allowance of claims 20-22, 27-30, 37, 38, and claims 40-44.

Claims 31-33, which were rejected over Larussa, in view of Machig et al., have been cancelled in order to expedite the allowance and issuance of this application.

The applicant has amended claim 23, which was not acted upon in the Office Action, to change its dependency from claim 1, cancelled in the Preliminary Amendment, to allowed claim 40. This combination of the system, including the mirror-mount feature in claim 23 will now add the second reflector for image enhancement and a novel combination.

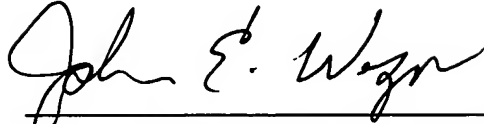

Similarly, claim 26 is herein amended to dependent upon claim 43. As so amended, claim 26 will add the additional focusing reflector to the combination of claim 43, including a metallized wall focusing reflector for enhanced image quality and reduced mirror cast. A novel combination.

With this amendment, it is believed that claims 23 and 26 should be allowed as well. Such action and passage of this application passed to issue is requested.

It is further requested that Fig. 22 be selected for the front of the patent since these figures reflect the versions with the most allowed claims.

Serial No. 10/655,974

Respectfully submitted,

A handwritten signature in black ink, appearing to read "John E. Wagner". The signature is fluid and cursive, with the first name "John" being the most prominent.
